

Sundance at FPGA Conference Europe

We're exhibiting at [FPGA Conference Europe](#) in Munich from **1 to 3 July 2025**. Visit our booth to see what we are working on, and how we can help you.

We'll be showcasing two of our latest FPGA-focused systems:

1. VCS³ - Ultra-Compact Zynq UltraScale+ Board

VCS³ is a 30 mm × 50 mm single-board computer built around the AMD Zynq UltraScale+ MPSoC. It is designed for autonomous machines, smart cameras, and edge automation. It includes four digital camera interfaces, 9-axis IMU, CAN-bus, LPDDR4 memory, and flexible boot options from SPI or eMMC.

2. SE300 - Multi-FPGA Platform with PolarFire SoC

SE300 is a modular embedded system based on Microchip's PolarFire SoC (MPFS460T) with four additional PolarFire FPGAs. It supports up to four FMC+ modules and features a flexible, JESD204B-compatible clock tree for synchronised multi-channel systems. Ideal for scalable MIMO, RF, and data acquisition applications, with support for ADC and DAC modules.

Featured Talk: Enabling Space Missions

Nory Nakhaee, Sundance

 Wednesday 2 July at 10:30

Learn how FPGA tech is enabling space applications where resilience and precision matter.
