

SUNDANCE

Meet Sundance at DroneX 2025

Sundance will be at [DroneX](#) in London, ExCeL, from 30 September to 1 October 2025.

We will be joined by **Ainstein AI**, our US partners, who will share our booth as we showcase our advanced radar altimeter solutions.

Our radar altimeter range covers UAV take-off, landing, and precision terrain following. The US-D1 is compact and lightweight, ideal for spraying or delivery drones at lower altitudes. The LR-D1 extends reliable measurements up to 500m for larger UAVs and industrial applications. The LR-D1 Pro adds dual-band precision and durability for high-speed or GPS-denied environments.

We are especially excited to present the US-D1 Pro, our newest model. It offers centimetre-level accuracy, advanced integration features, and a wider range, making it the best fit for complex UAV operations.
