Quality Policy Statement

Sundance Multiprocessor Technology Ltd. designs and manufactures electronics, boards and software for use in vision, sensor and robotics systems, alongside the fulfilment of third-party hardware and software.

We enable our customers to develop and maintain mission-critical applications worldwide.

Our management system complies with ISO9001:2015, ensuring that we continually improve and fulfil our main quality objectives:

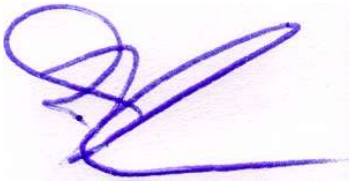

- To manufacture standard and customised products based on customer demand and expectations.
- To engineer products/solutions to achieve the most economical implementation without compromising performance.
- To provide a continually improving service to our customers.

Quality objectives are established during management review meetings and are based on customer needs, organisational performance metrics, and strategic priorities. Progress is measured using key performance indicators (KPIs), such as on-time delivery rates, returns and repair rates, and customer feedback trends.

We are committed to satisfying customer, statutory, and regulatory requirements and continually improving the effectiveness of our quality management system and the quality of our products.

The Managing Director (CEO), *Mr Flemming CHRISTENSEN*, is responsible for implementing this policy. This includes establishing, implementing, and maintaining a quality management system certified against ISO 9001:2015, setting and reviewing measurable quality objectives, and ensuring those objectives are met. Additionally, the Managing Director provides the necessary resources, determines and communicates roles and responsibilities, examines the effectiveness of the quality management system, assesses opportunities for continual improvement, and seeks structured quality feedback from customers.

The Quality Policy is reviewed annually.

Flemming CHRISTENSEN

Managing Director/CEO
