SUNDANCE

Discover our Latest Ventures and Achievements
from this Month

embeddedworld
Exhibition&Conference

We had a fantastic time at Embedded World 2024, where we experienced the latest in embedded technology and connected with many brilliant people.

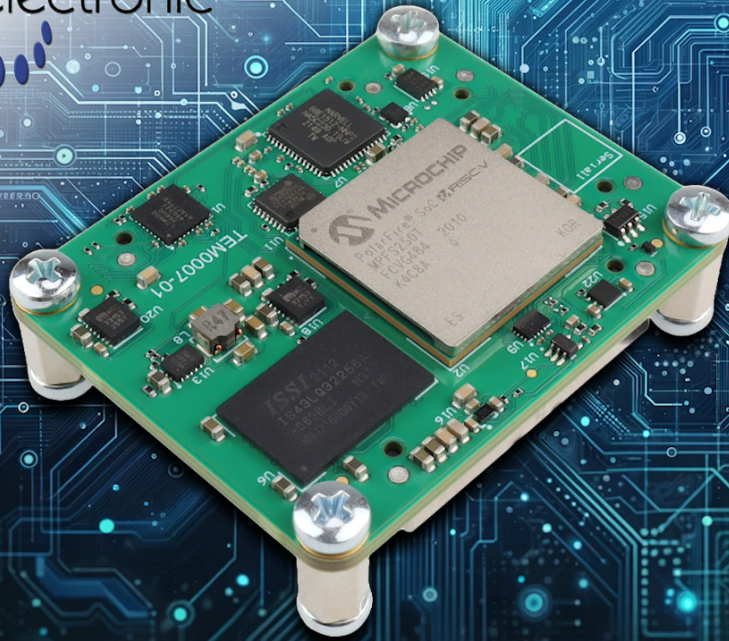

Some of our highlights included the engaging presentations at the 7Starlake forum and the well-organised displays at the Trenc Electronic booth.

A big thank you to the organisers and everyone who joined us, making this event memorable. We're already excited and gearing up for the next year—hope to see you there!

TEM0007

IN STOCK NOW

We are pleased to announce that the Trenz Electronic TEM0007-01-CHE11-A modules are currently in stock, and available to purchase right now!

This module integrates a Microchip PolarFire® SoC FPGA, offering advanced features such as gigabit Ethernet and USB connectivity, along with 1 GByte of LPDDR4 SDRAM and 64 MByte SPI Flash. It's designed to meet the needs of industrial applications requiring high reliability and robust performance.

"I am extremely satisfied with the service I received from Sundance. I was in desperate need of repairing these cards as there were no replacement parts available in the market. Sundance went above and beyond to ensure that my needs were met and that my electronic cards were fully functional again. I'm sure I will recommend your services and, of course, your products to anyone who needs this kind of service, especially those who are struggling to find replacement parts in this market." - Armando Escorcía
