

Sundance Newsletter December 2023

SUNDANCE

Discover our Latest Ventures and Achievements
from this Month

Seasons Greetings!

Sundance will be taking a holiday break starting the 22nd of December 2023. To ensure your orders are processed and dispatched in time, we encourage you to place them promptly. Nonetheless, we will resume normal operations on the 2nd of January, full of energy and ready for 2024.

We wish you a very Merry Christmas and a Happy New Year!

SMT835-ZU25DR-1!

The SMT835-ZU25DR-1 is a PCI express ZynqRF system comprised of the TEB08035 carrier board and the TE0835-02-MXE21-A RFSoc module.

The Zynq UltraScale+ RFSoc family integrates key subsystems for multiband, multi-mode cellular radios and cable infrastructure (DOCSIS) into an SoC platform that contains Arm-based processing.

EMC²-MPFS250!

Sundance unveils a new system which marries the Microchip PolarFire SoC MPFS250T from Trenz Electronic with our own EMC²-DP PC104 Carrier.

"Sundance was the first to add a "PowerPC" CPU with FPGA fabric to PC104, then, we were the first to add a 32-bit ARM CPU to PC104. Now, we're the first to add the PolarFire SoC to PC104." - says F.Christensen, CEO.

"I am extremely satisfied with the service I received from Sundance. I was in desperate need of repairing these cards as there were no replacement parts available in the market.

Sundance went above and beyond to ensure that my needs were met and that my electronic cards were fully functional again. I'm sure I will recommend your services and, of course, your products to anyone who needs this kind of service, especially those who are struggling to find replacement parts in this market." - Armando Escorcia
