Ainstein's: LR-D1

The LR-D1, a radar altimeter for mid-altitude long-endurance drones, enhances precision in auto take-off and landing. Superior to laser altimeters, it accurately measures altitude and velocity up to 500m. Ideal for UAV applications, it ensures reliability in challenging environments. The LR-D1 integrates seamlessly with UAV systems, essential for accurate surveillance missions.

"I am extremely satisfied with the service I received from Sundance. I was in desperate need of repairing these cards as there were no replacement parts available in the market.

Sundance went above and beyond to ensure that my needs were met and that my electronic cards were fully functional again. I'm sure I will recommend your services and, of course, your products to anyone who needs this kind of service, especially those who are struggling to find replacement parts in this market." - Armando Escorcia
