### New Product Release: PCIe104N!

The PCIe104N is a robust and secure solution centred around the Microchip PolarFire FPGA, tailored for industries where both performance and security are critical. It features the MPF500T-1FCG1152I FPGA from Microchip's PolarFire series as the primary component, with the option to configure the module with the MPF300T-1FCG1152I device for specialised applications.

Designed for applications in aerospace, industrial automation, and other industries requiring high security, ruggedness, and flexibility. Whether handling secure communications, real-time data processing, or complex control systems, the PCIe104N offers a reliable and secure platform to meet the demanding needs of modern, mission-critical applications.

Find out more about the PCIe104N by clicking the link below.

"I am extremely satisfied with the service I received from Sundance. I was in desperate need of repairing these cards as there were no replacement parts available in the market. Sundance went above and beyond to ensure that my needs were met and that my electronic cards were fully functional again. I'm sure I will recommend your services and, of course, your products to anyone who needs this kind of service, especially those who are struggling to find replacement parts in this market." - Armando Escorcia
