## Compter-On-Module for High Perfomance Computing!

A relatively new standard, COM-HPC, is a modular open standard for building high-performance embedded computing systems.

In this blog, we detail the COM-HPC options we have on offer from 2 of our partners: Trenz Electronic's TE0830 module and 7Starlake's SK518 carrier board.

For full product details and how to secure your module, click the link below.

# DPict Imaging Releases DP-810!

The DP-810 is a game-changer for 4K video, offering a low-power, Linux-based platform with Qualcomm processing. Tailored for Sony Block cameras, delivering high-quality video encoding and various connectivity options, including HDMI and wireless capabilities. Ideal for OEMs, it provides configuration tools and API support for custom integration.

For product specs and purchasing information, click the link below.

"I am extremely satisfied with the service I received from Sundance. I was in desperate need of repairing these cards as there were no replacement parts available in the market.
Sundance went above and beyond to ensure that my needs were met and that my electronic cards were fully functional again. I'm sure I will recommend your services and, of course, your products to anyone who needs this kind of service, especially those who are struggling to find replacement parts in this market." - Armando Escorcia
