

# RoHS, REACH, PFAS, and POPs Compliance Declaration

September 2025

Sundance Multiprocessor Technology Limited (Sundance) is dedicated to serving you by providing high-quality products that meet environmental regulations, including restrictions on hazardous substances (RoHS), UK Registration, Evaluation, Authorisation and restriction of Chemicals (REACH), new Per- and Polyfluoroalkyl Substances (PFAS) requirements, and the UN Stockholm Convention on Persistent Organic Pollutants (POPs). We are providing you with the following information to assist you in meeting your environmental policies and procedures.

## RoHS Compliance

Sundance produces products that are RoHS 3 compliant. RoHS (Directive 2011/65/EU as amended by 2015/863/EU) restricts ten hazardous substances. These substances are not present in finished Sundance products above the permitted threshold limits unless covered by exemptions under the RoHS Directive. Sundance cannot guarantee that inventory held by distributors or other third parties is RoHS compliant.

Restricted Substance	Maximum Threshold Limit
Cadmium and its compounds	100 ppm (0.01 weight %)
Mercury and its compounds	1000 ppm (0.1 weight %)
Hexavalent chromium and its compounds	1000 ppm (0.1 weight %)
Lead and its compounds *	1000 ppm (0.1 weight %)
Polybrominated biphenyls (PBB)	1000 ppm (0.1 weight %)
Polybrominated diphenyl ethers (PBDE)	1000 ppm (0.1 weight %)
Decabromodiphenyl ether (DecaBDE)**	1000 ppm (0.1 weight %)
Bis(2-ethylhexyl) phthalate (DEHP)***	1000 ppm (0.1 weight %)
Butyl benzyl phthalate (BBP)***	1000 ppm (0.1 weight %)
Dibutyl phthalate (DBP)***	1000 ppm (0.1 weight %)
Diisobutyl phthalate (DIBP)***	1000 ppm (0.1 weight %)

\*Except when allowed by the Directive, for example: 3500 ppm in steel, 4000 ppm in aluminium alloys, and 40000 ppm in copper alloys.

\*\*DecaBDE is included in the PBDE group and restricted at the same threshold.

\*\*\*The restriction of DEHP, BBP, DBP and DIBP applies to all products since 22 July 2019. Exemptions for certain medical devices and monitoring instruments applied until 22 July 2021 but have since expired.

The compliance of Sundance products with RoHS is monitored and maintained by:

1. Controlling the materials and finishes used in our products.
2. Carrying out periodic analysis of our products when required.

## UK REACH Compliance

In June 2007, the European Union Regulation (EC) 1907/2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) was first released. This Regulation establishes specific duties and obligations for companies in the European Union (EU) that manufacture or import substances on their own, in preparations, or in articles. Following the UK's departure from the EU, we now operate under "UK REACH". The rules are broadly the same but are managed separately by the UK regulator, the Health and Safety Executive (HSE).

- Under the structure of the UK REACH Regulations, Sundance is a manufacturer and supplier of "articles" to our customers. We do not manufacture or supply "substances" or "preparations", and our articles do not involve the intentional release of substances. Accordingly, we foresee no registration or pre-registration requirement for the products we supply to you.
- Sundance believes that even though UK REACH is a UK regulation, our products are affected in all geographical regions. Therefore, Sundance applies UK REACH requirements worldwide.
- Sundance monitors the Substances of Very High Concern (SVHCs) in our products, as defined by UK REACH. This is an ongoing process since the Candidate List is updated in stages.
- Customers are encouraged to visit the following site for the most up-to-date information on the current list of SVHCs under UK REACH: [UK REACH Candidate List of substances of very high concern \(SVHCs\) for Authorisation - HSE](#)
- Customers are encouraged to visit the following site for the most up-to-date information on the current list of SVHCs under [ECHA: EU REACH Candidate List of substances of very high concern \(SVHCs\) for Authorisation - ECHA](#)
- Sundance products (articles) do not contain SVHCs above the threshold limit value of 0.1% w/w, in line with ECHA Candidate List (250 SVHCs as of July 2025) and the current UK REACH Candidate List.
- Environmental regulations change constantly. We will periodically update this letter to keep you informed of changes that affect Sundance products.

## *PFAS Compliance*

Per- and Polyfluoroalkyl Substances (PFAS) are a group of synthetic chemicals that are highly persistent in the environment and can accumulate in living organisms. Because of their persistence and potential risks to health and the environment, PFAS are under increasing regulatory control in the UK and EU.

In the UK, PFAS are regulated under UK REACH. The Health and Safety Executive (HSE) has identified PFAS as a priority in the UK REACH Rolling Action Plan for 2025–2027 and is assessing possible restriction measures.

Certain PFAS, including perfluorooctanoic acid (PFOA), perfluorooctane sulfonate (PFOS), and perfluorohexane sulfonic acid (PFHxS), are already restricted under UK law through the POPs Regulation. Time-limited exemptions, including the use of PFOA in firefighting foams, ended in July 2025.

In the EU, the European Chemicals Agency (ECHA) is evaluating a group-wide PFAS restriction proposal submitted by five Member States (Denmark, Germany, the Netherlands, Norway and Sweden). The process is ongoing.

Sundance has reviewed the materials used in our products. Sundance products (articles) do not contain PFAS above the threshold limit values set by UK or EU law.

Customers are encouraged to visit the following sites for the most up-to-date information:

- [PFAS - UK REACH Rolling Action Plan 2025-2027 \(HSE\)](#)
- [PFAS Information \(ECHA\)](#)

Environmental regulations on PFAS are developing rapidly. We will periodically update this letter to keep you informed of changes that affect Sundance products.

## *POPs Compliance*

The UN Stockholm Convention on Persistent Organic Pollutants (POPs) is an international treaty that aims to eliminate or restrict the production and use of hazardous chemicals that persist in the environment, accumulate in living organisms, and pose risks to human health and ecosystems.

The UK enforces compliance with these requirements through the retained POPs Regulation (Regulation (EU) 2019/1021, as amended). In April 2025, the UK updated this regulation by removing Dechlorane Plus and UV-328 from Annex I. Other substances such as PFOA, PFOS and PFHxS remain restricted with limited exemptions. For the current list of regulated POPs, please refer to UK government guidance: [Using persistent organic pollutants \(POPs\) - GOV.UK](https://www.gov.uk/guidance/using-persistent-organic-pollutants-pop)

Sundance is committed to meeting these standards. We have reviewed our Material Safety Data Sheets (MSDS) for all relevant materials and confirm that our products do not contain substances classified as POPs above regulatory thresholds.

As a small company, Sundance relies on practical due diligence and supplier documentation to support compliance. This review process, aligned with UK environmental regulations, provides confidence that POPs are not present in our products.

Sundance continues to monitor regulatory changes and remains committed to maintaining high standards of product safety and environmental responsibility. This ongoing process supports our commitment to compliant, safe products and to wider environmental and public health goals.
