

RoHS 3, REACH, and POPs Compliance Declaration

March 2025

Sundance Multiprocessor Technology Limited (Sundance) is dedicated to serving you by providing high-quality products that meet environmental regulations, including restrictions on hazardous substances (RoHS) and UK Registration, Evaluation, Authorisation, and restriction of Chemicals (REACH). Additionally, we are committed to ensuring compliance with the UN Stockholm Convention on Persistent Organic Pollutants (POPs). We are providing you with the following information to assist you in meeting your environmental policies and procedures.

RoHS Compliance

Sundance produces products that are RoHS compliant. RoHS compliant means that the substances restricted by the EU Directive 2015/863 and subsequent amendments of the European Parliament are not contained in a finished product above the threshold limits stated below unless the restrictive substance is subject to an exemption contained in the RoHS Directive. Sundance cannot guarantee that inventory held by distributors or other second or third parties are RoHS compliant.

Restricted Substance	Maximum Threshold Limit
Cadmium and its compounds	100 ppm (0.01 weight %)
Mercury and its compounds	1000 ppm (0.1 weight %)
Hexavalent chromium and its compounds	1000 ppm (0.1 weight %)
Lead and its compounds *	1000 ppm (0.1 weight %)
Polybrominated biphenyls (PBB)	1000 ppm (0.1 weight %)
Polybrominated diphenyl ethers (PBDE)	1000 ppm (0.1 weight %)
Decabromine diphenyl ether (DECA BDE)	1000 ppm (0.1 weight %)
Bis(2-ethylhexyl) phthalate (DEHP)**	1000 ppm (0.1 weight %)
Benzyl butyl phthalate (BBP)**	1000 ppm (0.1 weight %)
Dibutyl phthalate (DBP)**	1000 ppm (0.1 weight %)
Diisobutyl phthalate (DIBP)**	1000 ppm (0.1 weight %)

*Except when allowed by the Directive. For example, 3500 ppm in steel, 4000 ppm in aluminium alloys and 40000 ppm in copper alloys.

**The restriction of DEHP, BBP, DBP and DIBP shall apply to medical devices, including in vitro medical devices, and monitoring and control instruments, including industrial monitoring and control instruments, from 22 July 2021.

The compliance of Sundance products with RoHS may be monitored and maintained in one or more of the following ways:

1. Strictly controlling the materials and finishes that are used in our products
2. Periodic analysis, on an as-needed basis, of our products.

In June 2007, the European Union Regulation (EC) 1907/2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) was first released. This Regulation establishes specific duties and obligations for companies in the European Union (EU) that manufacture or import substances on their own, in preparations, or in articles. Subsequently the UK has left the EU which means that we are now operating under "UK REACH". The rules are broadly the same.

- Under the structure of the UK REACH Regulations, Sundance is a manufacturer and supplier of "articles" to our EU customers. We do not manufacture or supply "substances" or "preparations", and our articles do not involve the "intentional release of substances". Accordingly, we foresee no registration or pre-registration requirement for the products we supply to you.
- Sundance believes that even though UK REACH is a UK regulation, our products are affected in all geographical regions. Therefore, Sundance intends to implement UK REACH worldwide.
- Sundance monitors the substances of very high concern (SVHCs) in our products, as defined by UK REACH. This will be an ongoing process since the complete list of SVHCs will be released in stages.
- The customers are encouraged to visit the following site to get the most up-to-date information on the current list of SVHCs under UKREACH: [UK REACH Candidate List of substances of very high concern \(SVHCs\) for Authorisation](#)
- The customers are encouraged to visit the following site to get the most up-to-date information on the current list of SVHCs under ECHA: [ECHA Candidate List of substances of very high concern \(SVHCs\) for Authorisation](#)
- Sundance products (articles) do not contain Substances of Very High Concern (SVHC) above the threshold limit value of 0.1% w/w as per **ECHA 21st January 2025 with 247 SVHC**.
- Environmental regulations change constantly. We will periodically update this letter to keep you abreast of changes that affect Sundance products.

The UN Stockholm Convention on Persistent Organic Pollutants (POPs) is an international environmental treaty that aims to eliminate or restrict the production and use of certain hazardous chemicals that remain in the environment for long periods, bioaccumulate, and pose risks to human health and ecosystems. The UK enforces compliance with these regulations to prevent the use of POPs in products, following strict environmental safety protocols. For a comprehensive list of POPs, please refer to the UK government guidance on POPs: [Using persistent organic pollutants \(POPs\) - GOV.UK](#)

Sundance Multiprocessor Technology Limited (Sundance) is committed to upholding these standards. We have reviewed our Material Safety Data Sheets (MSDS) for all relevant materials and confirm that our products do not contain substances classified as POPs above regulatory thresholds.

Given our scale as a small company, we rely on reasonable due diligence and common-sense checks. Our review process, aligned with the rigorous standards of UK environmental regulations, provides us with confidence that POPs are not present in our products

Sundance continues to monitor regulatory changes and remains committed to maintaining high standards of product safety and environmental responsibility. This process ensures that Sundance upholds its commitment to producing high-quality, compliant products while supporting environmental and public health initiatives.
